(a) NMAP TO DISCOVER LIVE HOSTS USING NMAP SCANS ON THE TRYHACKME PLATFORM

AIM:

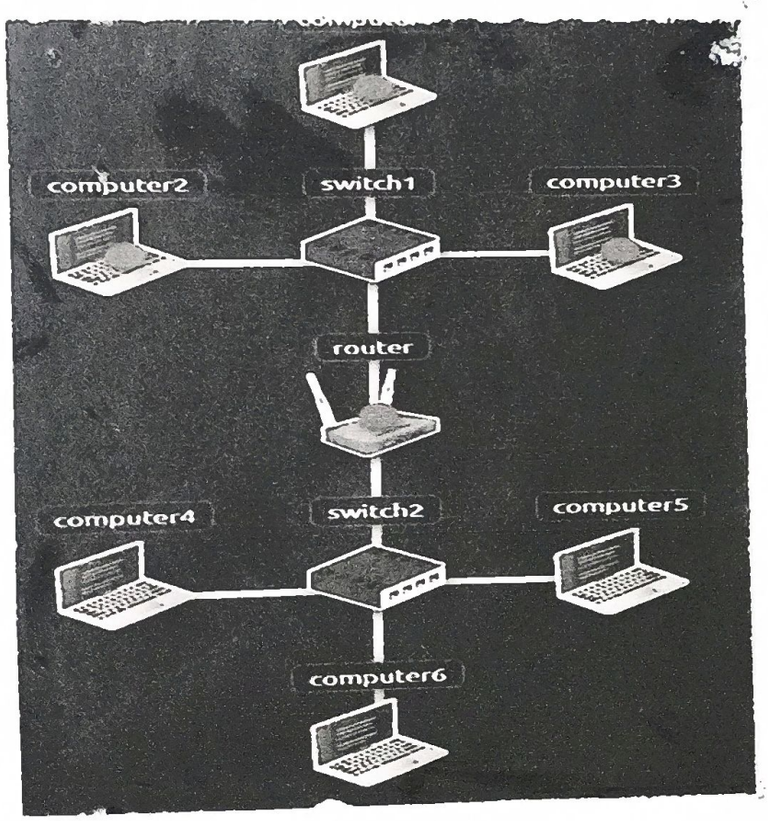

To discover live hosts using Nmap scans (ARP, ICMP, TCP/UDP) on the TryHackme platform.

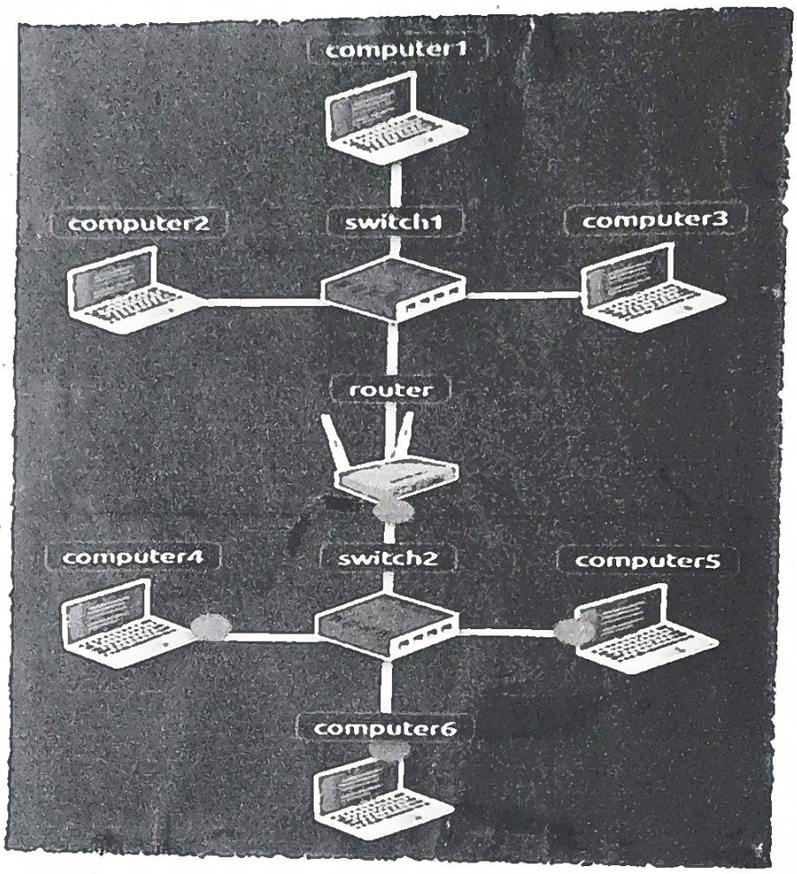

INTRODUCTION:

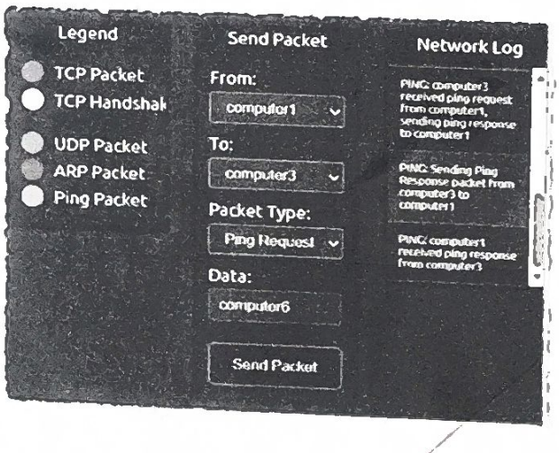

When targetting a network, we need an efficient tool to handle repetitive tasks. This tool should help us find out which systems are active and what services are running on those systems.

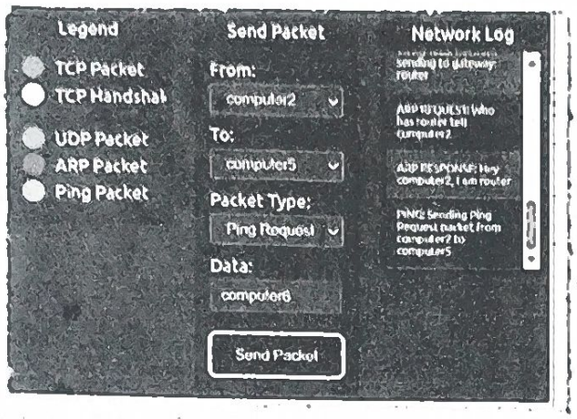

These four rooms also part of Network security module.

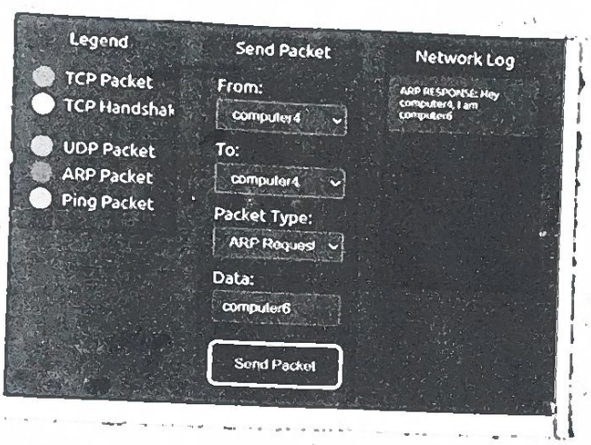

- Nmap Live Host Discovery
- Nmap Basic port scans
- Nmap Advanced port scans
- Nmap post port scans

computer3
Packet Type:
Ping Request
Data:
computer6
Send Packet
Network Log
PING: computer3 received ping request from computer1, sending ping response to computer1
PING: Sending Ping Response packet from computer3 to computer1
PING: computer1 received ping response from computer3

RESULT:

Thus, live hosts are sucessfully identified using Nmap ARP scanning.
